5) Power BI da "Ma'lumot/Model" ko'rinishi nima maqsadda?

- "Data view" (Ma'lumot ko'rinishi): Ma'lumotlarni jadval shaklida ko'rish, tahrirlash va o'zgartirish uchun ishlataladi. U ma'lumotlarning batafsil ko'rinishini taqdim etadi va oddiy transformatsiyalarni amalga oshirishga yordam beradi.
- "Model view" (Model ko'rinishi): Ma'lumotlar modelidagi barcha jadvallar, ustunlar va aloqalarni vizual ravishda ko'rsatadi. Bu murakkab aloqalarni boshqarish, yangi aloqalar yaratish va model tuzilishini optimallashtirish uchun foydalidir, ayniqsa katta modellar uchun.

Sum of Profit

8. Shartli formatlash

- Jadval tanla → **Format** → **Conditional formatting** → **Background color**
- Field: Profit
- Yuqori qiymatlar uchun **yashil**, past uchun **qizil**.
- "Gradient" rejimidan foydalan.

9. Hisobotni Power BI Service ga publish qilish

- **Publish** tugmasini bos.
- Microsoft hisob bilan kir.
- **My Workspace** tanla → Publish tugaydi.
- Hisobotni **app.powerbi.com** da ko'r.

10. Hisobotni baham ko'rish (simulyatsiya)

- Power BI Service → Hisobotni och.
- **Share** → email manzil yoz → "View only" ruxsat → Share.

14. PowerPoint ga eksport qilish

- Power BI Service → **Export** → **PowerPoint**
- "Embed live data" tanla → yuklab ol.
- PowerPoint da och → interaktiv ma'lumotlar saqlanadi.

15. Rejalashtirilgan yangilanish

- Power BI Service → Workspace → Dataset tanla.
- **Refresh** → **Schedule refresh**
- Har kuni (masalan, 08:00) belgila → Save.
